

Piktochart

PDF

Kurze Zusammenfassung

Application for creating infographics.

Link

<http://piktochart.com/>

Beschreibung

After registration, we can use the program to create appealing illustrations. We can choose from a variety of templates or alternatively, start work on a blank page. The site is user-friendly, making it easy to create posters, infographics and presentations. You can drag and drop text, images, illustrations and icons onto your worksheet.

You can save the final result in various formats (PNG, PDF).

The screenshot shows the Piktochart platform's user interface. On the left, there's a sidebar with various project categories like 'Újat készíteni' (Create New), 'Infografika' (Infographic), and 'Előadások' (Presentations). The main area displays three different infographic templates:

- Az alvás fontossága**: An infographic titled "the importance of sleep" with sections on sleep duration (e.g., 36% of people sleep less than 7 hours) and how sleep reduces mood changes.
- Érdekes tények a Halloweenról**: An infographic titled "INTERESTING FACTS ABOUT HALLOWEEN" featuring facts like "Trick-or-treating comes from 'stealing'" and "Michael Myers' mask is actually a William Shatner mask".
- Bal agy kontra jobb agy**: A comparison between the Left Brain and Right Brain, listing activities like Logic, Linear Thinking, Sequencing, Mathematics, Facts, and Thinking In Words for each side.

There is the possibility for learning within the site, using the Tour.

Vorteile

- easy to use
- there are a lot of templates, examples that give inspiration

Nachteile

- there are templates and features that are only available in the premium version

Verwendung beim Lehren/ Lernen

- simple tool to create online infographics
- 3 members can be invited to collaborate even in the free version

Infographics

"A picture is worth a thousand words."

In our increasingly visual world we often prefer to look at a well-designed, informative poster with some text than read a long leaflet on the same subject. This is particularly true for our students, so it makes sense to present them the information in a form they can easily digest. An excellent tool for this is an infographic, which presents the information using images.

You can also use it to check understanding: ask students to present in an infographic what they have learned. It is also useful for organizing learning content from different parts of the curriculum. Units of measurement or historical events are a good example for this.
