Beschreibung

We can find quizzes in the following topics:

The screenshot shows the ThatQuiz website interface. At the top, the logo "thatquiz" is displayed in a stylized font. To the right, there is a navigation bar with links for "Teachers: login or create an account or [search] or [learn more]". Below this, there are input fields for "Login/Email" and "Password", and a "Login" button. The main content area is divided into several categories of quizzes, each with a grid of buttons representing different topics. The categories are: integers, fractions, concepts, geometry, vocabulary, geography, and science. Each category has a set of buttons with icons and text labels. For example, the "integers" category includes buttons for Arithmetic, Inequality, Averages, Exponents, Factors, Algebra, and Calculus. The "vocabulary" category includes buttons for English, Spanish, French, and German. The "geography" category includes buttons for Americas, Europe, Africa, and Asia. The "science" category includes buttons for Cells, Anatomy, Elements, and Conversion. At the bottom of the page, there is a language selection bar with links for English, Español, Deutsch, Français, Italiano, Português, Català, Euskara, Magyar, Polski, Slovenščina, Türkçe, Ελληνικά, Українська, 中文(简体), and עברית. To the right of the language bar, there is a "Have a test code?" section with a "Test Code" input field and an "Enter" button.

This is how a selected quiz looks like:

Fractions & Decimals

Express as a simple fraction in lowest terms

$$\frac{2}{4} + \frac{3}{4} = \frac{\input{text}}{\input{text}}$$

Right

Wrong

Clock

Vorteile

- timing and feedback can be set
- different levels of difficulty
- length of test (number of items) can be defined

Nachteile

The design is very simple (black and white).

Verwendung beim Lehren/ Lernen

The programme offers ready-made tests, mainly in mathematics, but there are foreign language and geography tests as well.

We can generate a link for the test of our choice and share it with the students. We can set the timing, the level of difficulty and even automatic evaluation of the result.

Art des Tools

Quiz, test, voting

Quiz, test, voting

Online tests and quizzes can be re-used and shared - no problem if you want to use for practice.

There is usually a wide range of question types to choose from and the evaluation is much easier than with traditional tests.

Some of the tools below can also be used to collect quick feedback, at a given point of time, even anonymously, so that the teacher can always get an idea of how well the students have understood the material.
