

# Mindmeister

[PDF](#)

## **Kurze Zusammenfassung**

Mindmapping software.

## **Link**

<https://www.mindmeister.com>

## **Beschreibung**

It helps us visualise our thoughts and knowledge in a creative way, organised according to our own point of view, using shapes and colours.

## **Vorteile**

Supports online collaboration.

## **Nachteile**

We are only allowed to create 3 mindmaps in the free version.

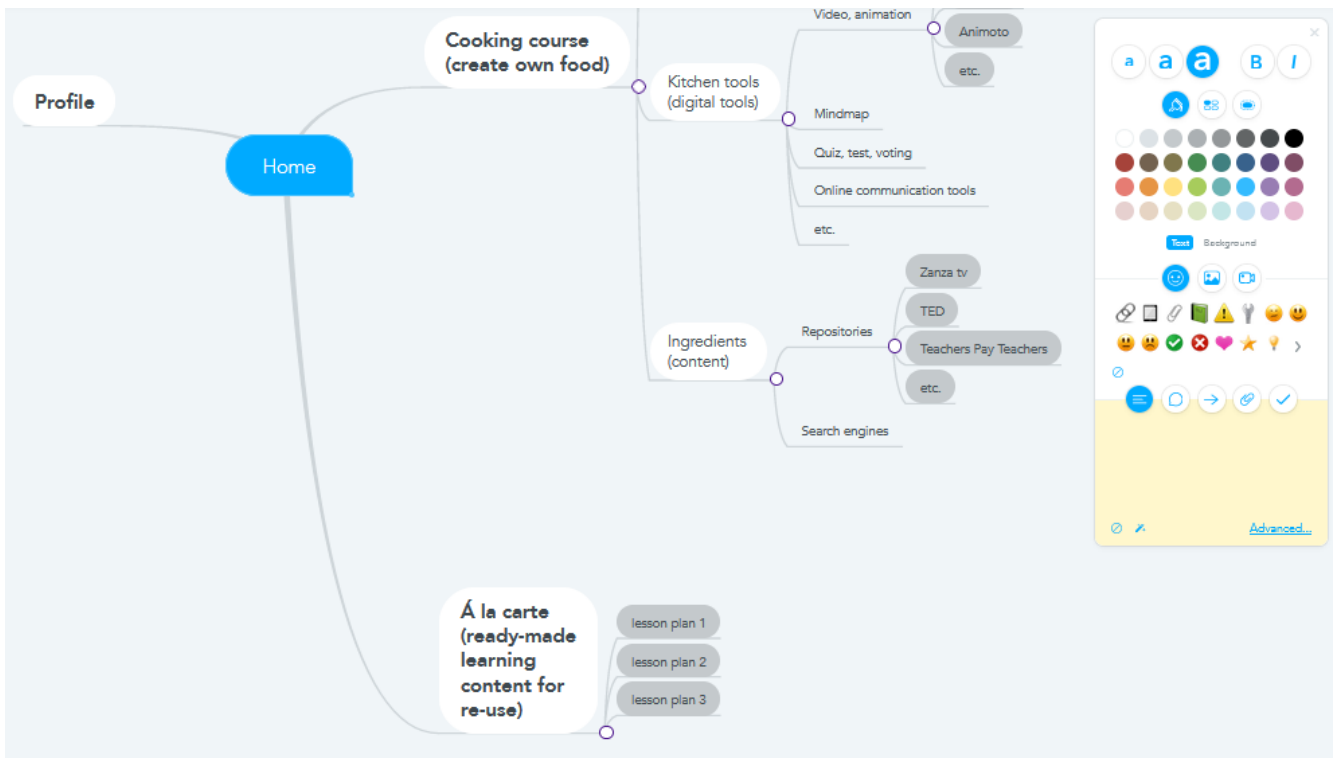

## **Verwendung beim Lehren/ Lernen**

- organising knowledge, concepts
- visual representation of connections
- highlighting the key points - facilitating learning

## **Tutorial-Video(s)**

## **Beispiele**

This example shows how you can sketch out the proposed structure of a website:

## Art des Tools

## Mind map

# What is a mind map?

A mind map is a visual tool for structuring thoughts. It is a hierarchical diagram of everything that has been discussed. Key ideas/text/symbols/colours helps trigger mind flow and more detailed explanation to the presenter.

# What is it good for?

As a study aid — the visual element is great at triggering memories.

Researching new products and developing new ideas — as you discuss topics, they are recorded, allowing you to track idea development more easily, and for visualization for multiple people.

As a problem-solving tool — helpful in brainstorming problems and building on ideas to determine solutions.

As a presentation method — one is able to show how a process was developed, visualizing alternatives and topics discussed.

1. Start with a focus - This idea or thought needs to be the center of your mind map.
2. Plot sub-groups - From your main idea, you will determine key areas, which are sub-groups of your focus.
3. Develop further - Each of your sub-groups will likely to have their own set of sub-groups (use of a single keyword).
4. Expand - Add additional facts, pictures, symbols etc.
5. Add connections between (sub)groups to present interrelations.

## An example
