Beschreibung

We all like tales and stories - not only kids do. All the evidence shows that storytelling and tales slowly disappeared from classroom lessons, due to a misbelief that stories and pictures do not fit into scientific thinking as they displace the crystal-clear logical train of thought.

The VoiceThread storyteller gives us the technical possibility to insert media elements (text, sound, image, video) into a presentation, a chronology (timeline) easily and quickly. The comic-style story can be shared with students, embedded in other applications and, as the story can be commented on by students in writing and orally (webcam, microphone), it can be collaborative.

After registration we can start creating our own content by clicking on Create, where we can upload documents, images, audio, video and more.

Vorteile

- can be integrated with Canvas
- both verbal and written comments are possible
- it is easier to explain something "in person"
- different points of view can be confronted
- makes online communication and education more personal
- there is a configuration where students do not to see each other's comments

Nachteile

- some students feel less comfortable speaking on video
- students may find the interface difficult to navigate at first

Verwendung beim Lehren/ Lernen

The teacher can upload and share documents, presentations, images, audio or video files with students. Both the teacher and the students can comment on the posted material.

Some ideas for using the tool:

- Publish something you want to receive feedback on (e.g. student's work - drawing, writing, etc.).

- Discuss a topic, a reading or an image.
- Raise a topic and brainstorm ideas.

Art des Tools

Timeline

Timeline

A timeline can be used for any topic where the order of events, the chronological order matters. We can use it when teaching history, but also when presenting a process or a succession of events.

For example, you can display historical events of a particular period with dates and inert notes to them with the most important facts.

It is not only for teachers - students can also create a timeline collaboratively when they recap on a topic.

In timeline creator apps you can use a variety of templates to make your own stunning and meaningful infographics in no time.

Online communication

The tools listed below facilitate communication during online teaching. Their main features include voice and video calling, messaging, screen sharing and file sharing.

Presentation

Using one of the tools below instead of the usual - and let's face it, often boring - PowerPoint presentation will surely result in success.

Being short of time, you can turn a previously prepared ppt into a video in just a few steps. Choose *Save As*, then save the presentation as *.mp4* and you're done.

Story telling

Storytelling

Personal stories are a very effective way of introducing a topic as they engage students.

The following apps can be used to add various media elements to stories and then share them with students, or even ask them individually or in groups to tell stories, either related to a personal experience or a subject.
