Short summary

Online games (quiz, puzzle, survey)

Link

<https://kahoot.com/>

Description

The online group work software allows you to create quizzes, quizzes, discussions, and exercises. The solution is available online on computers, tablets, laptops and phones.

Kahoot includes four types of tasks (quiz, puzzle, survey, debate), which cannot be mixed.

Students can join the game by getting the task ID (e.g. by projecting or writing the number on a whiteboard) and joining the game on kahoot.it with the ID number.

The app runs on Android, Apple iOS and Windows.

If the students are not registered, the results are not available later, they are not saved, they can only be downloaded (even in Excel) immediately after the game is finished.

Advantages

- Simple, easy to use
- Platform independent
- Get immediate feedback

Disadvantages

- You can access certain features through a paid system (indicated by a crown in the top right corner of the app).

Usage in teaching/learning

- Quiz type - one question can have 4 possible answers, one correct answer can be marked. Can also be played in team mode.
- Jumble - you have to put the answer choices in the correct order and they are mixed together. This game cannot be played in Team mode.
- Survey task type - a task for situational awareness, a quick report can be made and feedback can be given. The feedback allows us to think about how to continue processing the knowledge. Can also be played in team mode.
- Discussion task type - debating game, quick question and answer type task. A question is created and we wait for answers, which are automatically recorded after the answer is given.

Type of tool

Interactive exercises

Interactive exercises

Using the tools listed below, you can create online exercises by inserting images, audio and video files. Browse through exercises created by others and modify them to suit your own purposes.

You can use the exercises you have created over and over again in the classroom or online.

Gamification

Gamification

Quiz, test, voting

Quiz, test, voting

Online tests and quizzes can be re-used and shared - no problem if you want to use for practice.

There is usually a wide range of question types to choose from and the evaluation is much easier than with traditional tests.

Some of the tools below can also be used to collect quick feedback, at a given point of time, even anonymously, so that the teacher can always get an idea of how well the students have understood the material.
