Descrizione

It is mostly used in education for storing and sharing study materials, assigning / requesting tasks, and writing tests. The LMS (Learning Management System) system, which supports the progress of students and tracks their activities, has a built-in logging feature. It can also be used as a Virtual Lerning Enviroment (VLE).

Courses can be created in the system into which content can be uploaded. Users can be registered or they might register and take courses themselves. Groups can also be created.

Learning environment

An effective virtual learning environment has both learning management and content management functions. It supports communication, file sharing and can handle student assignments.

Although there are many such platforms, most schools opt for one specific application.
