## Descrizione

We can find quizzes in the following topics:

The screenshot shows the ThatQuiz website interface. At the top left is the logo "thatquiz". To the right, there is a navigation bar with links: "Teachers: login or create an account or [search] or [learn more]". Below this are input fields for "Login/Email" and "Password", and a "Login" button. The main content area is divided into several categories of quizzes, each with a grid of buttons. The categories are: integers, fractions, concepts, geometry, vocabulary, geography, and science. Each button contains an icon and the name of the quiz topic. For example, under "integers", there are buttons for "Arithmetic", "Inequality", "Averages", "Exponents", "Factors", "Algebra", and "Calculus". Under "vocabulary", there are buttons for "English", "French", "Spanish", and "German". Under "geography", there are buttons for "Americas", "Europe", "Africa", and "Asia". Under "science", there are buttons for "Cells", "Anatomy", "Elements", and "Conversion". At the bottom left, there is a list of languages: English, Español, Deutsch, Français, Italiano, Português, Català, Euskara, Magyar, Polski, Slovenščina, Türkçe, Ελληνικά, Українська, 中文(简体), עברית. At the bottom right, there is a section for "Have a test code?" with a "Test Code" input field and an "Enter" button.

This is how a selected quiz looks like:

**Fractions & Decimals**

Express as a simple fraction in lowest terms

$$\frac{2}{4} + \frac{3}{4} = \frac{\input{text}}{\input{text}}$$

Right

Wrong

Clock

## Vantaggi

- timing and feedback can be set
- different levels of difficulty
- length of test (number of items) can be defined

## Svantaggi

The design is very simple (black and white).

## Utilizzo per l'insegnamento/apprendimento

The programme offers ready-made tests, mainly in mathematics, but there are foreign language and geography tests as well.

We can generate a link for the test of our choice and share it with the students. We can set the timing, the level of difficulty and even automatic evaluation of the result.

## Tipologia di strumento

### Quiz, test, voting

### Quiz, test, voting

Online tests and quizzes can be re-used and shared - no problem if you want to use for practice.

There is usually a wide range of question types to choose from and the evaluation is much easier than with traditional tests.

Some of the tools below can also be used to collect quick feedback, at a given point of time, even anonymously, so that the teacher can always get an idea of how well the students have understood the material.
