Descrizione

Jitsi. Meet is a simple and free application for online video conferences.

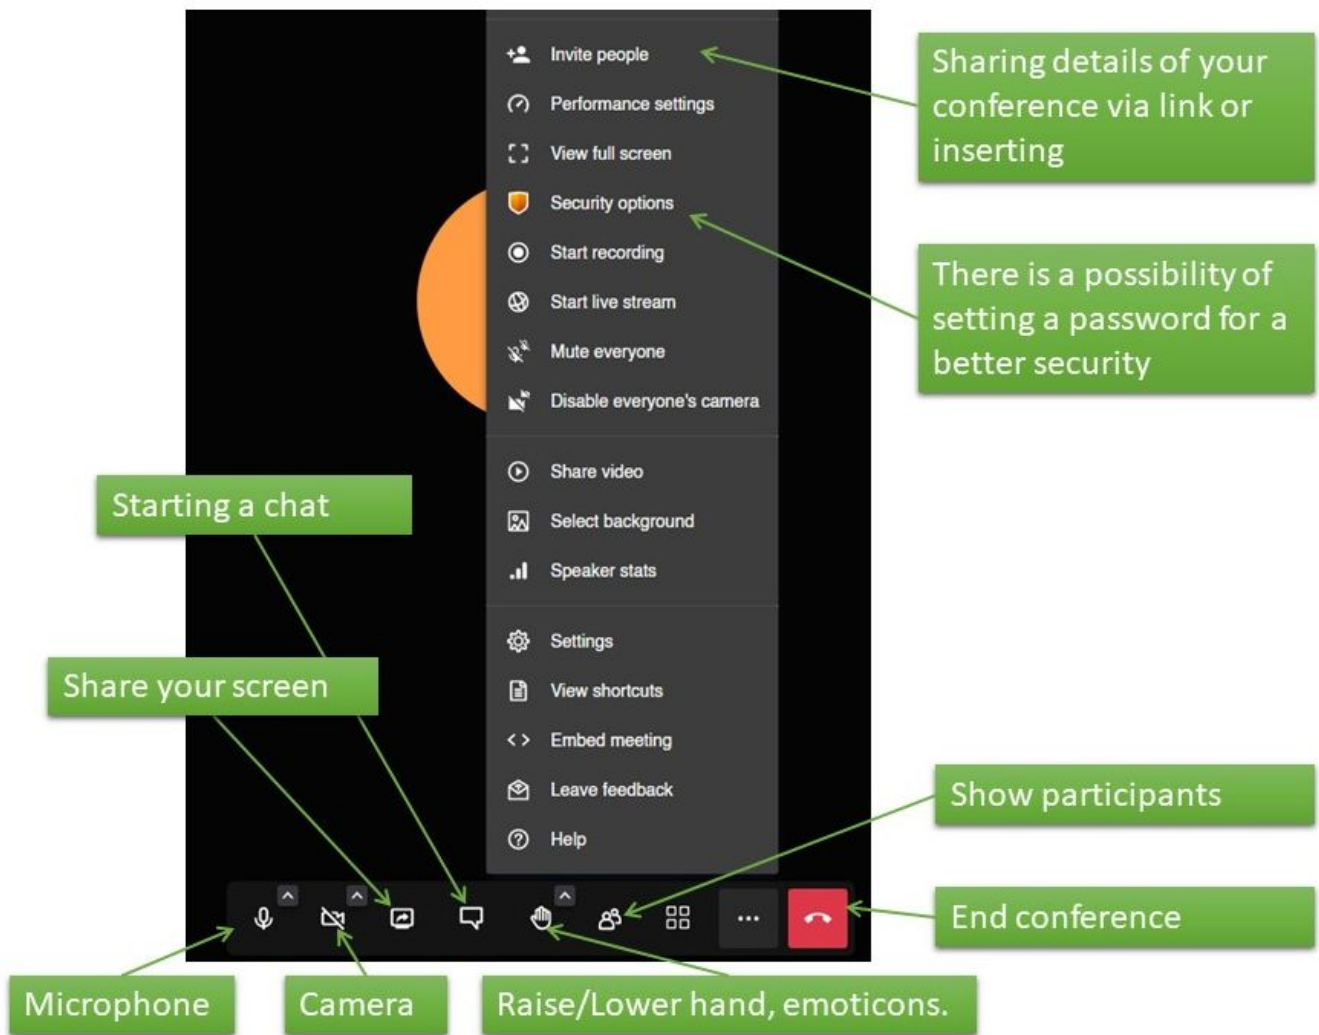

Teachers have the possibility to share their screens in order to show various notes, PDFs, websites or videos to students. There is no time limit, and the number of users is not limited either – however, the more users, the more unstable the system can become.

Give your conference/meeting a title/name, and it is all ready to start. Students are given the title and so they can join instantly. There is no need for registration, they only enter their names. For a safer usage, a password can also be set.

Jitsi.Meet can be linked to your Google or Microsoft account, so you can integrate it with your Google or Microsoft calendar. In addition to starting an online video conference, you can also record the meeting and save it to your Dropbox account, or link it to your YouTube channel to start a live video stream.

The application has a simple, intuitive interface, similar to other video conferencing applications.

Vantaggi

- No registration required
- Simple interface
- Easy integration with other systems

Svantaggi

- Through imprudent use, strangers may join the discussion.
