### Advantages

- timing and feedback can be set
- different levels of difficulty
- length of test (number of items) can be defined

### Disadvantages

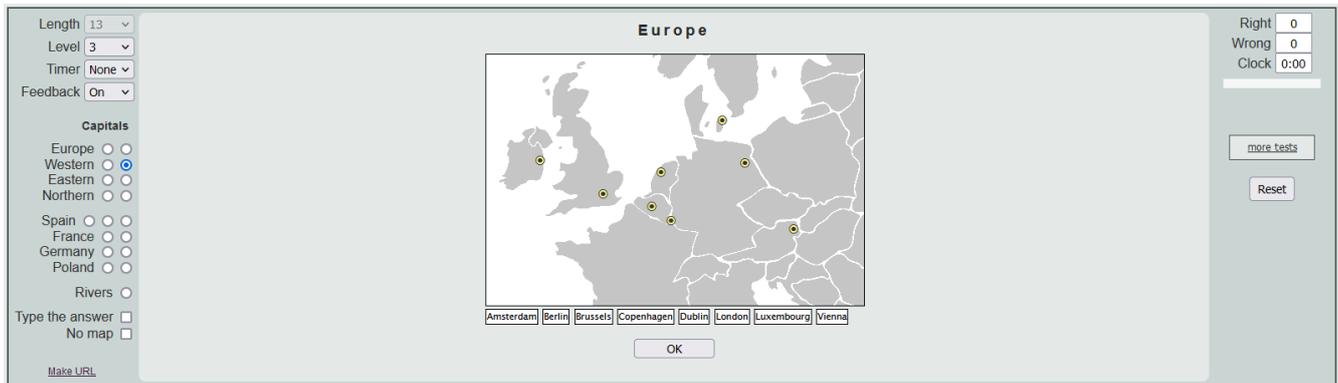

The design is very simple (black and white).

Usage in teaching/learning

The programme offers ready-made tests, mainly in mathematics, but there are foreign language and geography tests as well.

We can generate a link for the test of our choice and share it with the students. We can set the timing, the level of difficulty and even automatic evaluation of the result.
