- Pricing teljesen ingyenes
- Interface language angol
- Does it have a built-in repository where we can browse content created by other teachers? no
- Does the free version support online cooperation? no
- Difficulty kezdőknek
- Download PDF PDF

Description

Open source framework for creating various interactive content types.

Advantages

The system is constantly being developed, offering plugins for the main content management platforms.

Usage in teaching/learning

If you have a presentation or video (even a video shared by someone else on YouTube), you can easily add a variety of interactive elements (text, images, links or even test questions at specific points of the video).

Tutorial video(s)
