### **Short summary**

Simulații interactive pentru subiecte de științe ale naturii

### **Link**

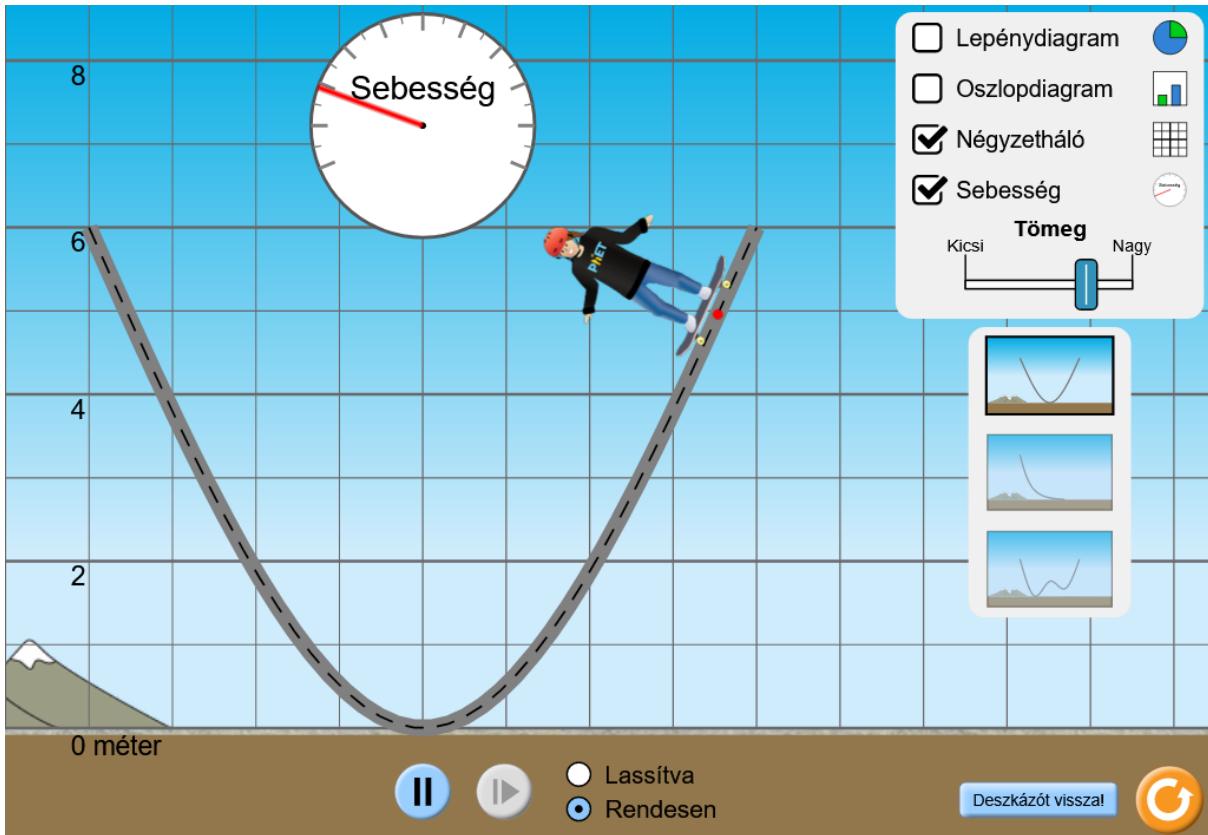

<https://phet.colorado.edu/hu/>

### **Description**

Putem căuta simulații pentru materiile fizică, chimie, matematică, geologie și Fizika, kémia, matematika, geografie și biologie.

The screenshot shows a search interface for PhET simulations. On the left, there's a sidebar with a 'SUBJECT' dropdown menu containing categories like Fizika, Mozgás, Hang & hullámok, Munka, energia & teljesítmény, Hő & hőmérséklet, Kvantumjelenségek, Fény & sugárzások, Elektromosság, mágnesek & áramkörök, Kémia, and Általános kémia. A 'Mozgás' checkbox is checked. In the center, a search bar displays '14 Results'. Below it are four thumbnail previews of physics simulations: 'Energia Gördeszkpark' (Energy Skate Park), 'Energia Gördeszkpark - alapok' (Energy Skate Park Basics), 'Erőgyensúly' (Balancing Act), and 'Erők és mozgás - alapok' (Forces and Motion Basics). Each preview includes a small logo and a 'Sort by: A-Z' dropdown menu at the top right.

Az egyes szimulációkhöz kapcsolódó tevékenységeket, bejelentkezés után tanári tippeket is találunk.

Simulațiile pot fi integrate cu propriul site web, în felul următor:
