

# **Desert Island**

Submitted by Jónás Diána on Wed, 06/15/2022 - 12:22

## **Type of plan**

Lesson plan

## **Sector**

Arts and humanities

## **Topic, learning area**

Conditionals, grammar

## **Grade**

13th grade

## **Learning and development goals**

Students revise and practise the grammar material they have previously learned

## **Concepts**

first, second, third conditional

## **Required tools**

smartphone

## **Introductory part and preparation of the lesson / project plan**

If it could be attached, it would be ppt, so we can use the pdf to guide the frame story in more modest circumstances.

Pg. 0-5: Warm up - Students collect words/phrases on mentimeter with "desert island" theme.

Pg. 5-10: Shipwreck - Students randomly choose one of a variety of character cards for themselves, based on which they have to "rescue 5 assets from a sinking ship".

## **Implementation of the lesson / project plan**

P.10-30: Staying alive - Three groups are formed randomly, from now on you have to work together in groups. The three groups are formed in three different locations: coastal, mountain, jungle. Here they have to design a house/shelter together (drawn on paper) using the tools available.

P. 30-45: SOS - Students have to write 10 sentences in first conditional on redmenta with ideas for escape from the island (e.g. If we can cut down a tree, we'll be able to light a huge fire)

P. 45-60: A year later - They have lost all hope of escape, so in the second conditional they have to write a diary entry about what they would do if they got out. They then show this to someone in the group, correcting each other for any mistakes.

P. 60-75: Escaping - Students have to solve a Kahoot quiz to get off the island.

P. 75-90: Back home - Students in groups of three (one person from each location) discuss what they experienced on the island, what they did, ate, drank, etc.

### **Digital tools used**

Redmenta

Kahoot

Mentimeter

### **Evaluation plan**

For redmenta, teacher assessment, Kahoot automatically assesses the answers, supplemented by teacher assessment, while for one of the independent tasks, peer assessment can be used, of course with the teacher's help where appropriate.

### **Differentiation**

Groups tend to have different levels of language skills, so this is something to keep in mind. Where appropriate, in pairs or groups of three, pairs/groups can be set up so that a higher level learner can help the weaker ones.

### **General subject(s)**

foreign language
