

BookWidgets

PDF

Kratek povzetek

A very complex tool with many functions, that you can create a test, quiz, puzzle, mind map, timeline with.

Povezava

<https://www.bookwidgets.com>

Opis

Na voljo so vzorci za različne predmete, ki si jih lahko ogledate, jih preprosto kopirate in prilagodite. Zlahka lahko naredite kopije iz lastnih orodij, kvize pa lahko uvozite tudi iz datoteke CSV.

Dovolj je, da povezavo do naloge delite z učenci, ni se jim treba registrirati. Učitelj ima na voljo podrobne statistične podatke o kvizih, rezultate pa lahko ponovno oceni.

Čeprav se brezplačni dostop izteče po enem mesecu, se učitelju ali šoli splača vanj investirati, saj lahko v eni aplikaciji najdejo veliko uporabnih elementov, poleg tega pa omogoča zelo kompleksen način ocenjevanja.

Prednosti

- vam ni treba ustvariti ločenega računa, saj lahko uporabite tudi Googlov ali Microsoftov račun.
- enostavno uporabo iz katere koli naprave (tablični računalnik, telefon, prenosni računalnik, namizni računalnik)
- registracija učenca ni potrebna
- na voljo so vzorčne naloge, s kopiranjem in spreminjanjem se lahko naučite uporabljati aplikacijo
- pri kvizih lahko učenci tudi rišejo, snemajo zvok, obstajajo naloge za ustvarjanje parov, v naloge je enostavno vključiti slike

Slabosti

- NI BREZPLAČNO: zanj je treba plačati letno pristojbino, brezplačen je le en mesec
- je zelo zapleten, ponuja veliko elementov, zato ga začetniki nekoliko težje uporabljajo

Uporaba pri poučevanju/učenju

Kako ustvariti lasten interaktivni digitalni pouk z orodjem BookWidgets:

<https://www.youtube.com/watch?v=tPOHxR0prKQ&list=PL87md46kVANJ8ianFsU9peef--N8lfRqm&index=2>

BookWidgets za srednješolske in visokošolske učitelje:

<https://www.youtube.com/watch?v=KBkHxzEHxQs&list=PL87md46kVANJ8ianFsU9peef--N8lfRqm&index=4>

Kako v nekaj minutah ustvariti interaktivne lekcije in samodejno ocenjene teste -

WEBINAR: <https://www.youtube.com/watch?v=E5EOI413ukE>

Primeri

- ustvarimo lahko ocenjevalne liste z različnimi elementi.
- za pomnjenje informacij lahko uporabimo igro spomina in igro s pari
- za pomnjenje pojmov lahko uporabimo tudi igro šibirke in križanko
- za ocenjevanje ravni razumevanja lahko uporabimo izhodne kartice

Widgets samples:

Test & Review

Exit Slip

Ask your students 2 questions about today's class.

Show ▾

Flash Cards

A classic self study tool, create cards containing text as well as pictures and audio.

The possibilities are endless.

Show ▾

Quiz

Create an intriguing quiz with multiple choice, image dragging, filling in the blanks, ... Student results get emailed to the teacher upon completion. Or get the results in Excel or your LMS.

Show ▾

Split Whiteboard

This widget splits the screen into two halves: the left side is a drawable area, the right side is a scrollable piece of rich text.

Show ▾

Split Worksheet

A widget with a split screen: on one side a worksheet with multiple question types, on the other a scrollable text.

This is great for reading comprehension exercises/tests.

Show ▾

Timeline

A timeline exercise for your students.

Show ▾

WebQuest

A WebQuest is an inquiry-oriented lesson format.

Show ▾

Whiteboard

Draw or write, on a background image or on an empty page.

The drawing can be sent to the teacher.

Show ▾

Worksheet

Create a worksheet with multiple question types.

This widget is very similar to the Quiz widget, but with a different layout.

Show ▾

Games

Bingo Card

A fun classroom game to e.g. reinforce vocabulary, this widget gives every student a scrambled bingo card. The teacher reads out the words one by one, until someone yells "Bingo!".

Show ▾

Crossword

A crossword puzzle, generated from a list of words and descriptions you provide. A fun way to test your students!

Show ▾

Hangman

The classic game with a hangman (or snowman), where you provide the list of words.

Show ▾

Jigsaw Puzzle

A classic Jigsaw puzzle

Show ▾

Memory Game

The memory game is not just for toddlers: use it for practicing vocabulary, grammar, history, ... You can also use images or math expressions to create challenging matching exercises.

Show ▾

Mind Map

Let your students create a mind map about a certain topic.

The resulting mind map can be shared with your teacher.

Show ▾

PairMatching

Similar to the memory game widget, except here, all cards are visible all the time. Use this for more challenging puzzles, or for differentiated learning.

Show ▾

Randomness

Pick random numbers, words or images.

Show ▾

Spot The Difference

Spot the difference game with popup labels.

Show ▾

Word Search

A classic word puzzle.

Just add a list of words, and BookWidgets creates you a search puzzle.

Show ▾

Pictures & Videos

Before/After

With the Before/After widget, your students can compare two pictures with each other. Move the slider to reveal more of one or the other picture, or set it to blend the pictures.

Show ▾

Frame Sequence

The Frame Sequence widget is great for showing a sequence of related pictures, for example, illustrating the germination process.

Show ▾

Students can easily move back and forth within the sequence.

Hotspot Image

Present a single image with hotspots on it. Hotspots can contain text, images, video or a combination thereof. Even small webpages can be in a popup.

Show ▾

Image Carousel

Create your own image slideshow on steroids.

Images can be made clickable on certain spots. Then you can either open another image, with a detail for instance, or map it to the location on Google Maps.

Show ▾

Image Viewer

Great if you want your students to explore a large, high resolution image. It allows them to pan around and zoom into specific areas.

Show ▾

Piano

Teach kids how to play the piano & read notes

Show ▾

Random Images

Guide speaking exercises by presenting students with one or more random images to discuss.

Images can be embedded into the widget, or loaded dynamically from online services like Picasa.

Show ▾

3D

A 3D file viewer, supporting various file formats

Show ▾

TipTiles

Picture tiles with descriptions, audio and video.

Show ▾

Vimeo Player

Embed a streamed HD Vimeo movies using a widget if it can't be embedded directly, e.g. inside of an ebook.

Show ▾

YouTube Player

Embed a streamed HD YouTube movie using a widget if it can't be embedded directly, e.g. inside of an ebook.

Show ▾

Math

Active Plot

An interactive math plot. Enter a formula, and students can play around with the parameters and immediately see the effect on the plot, thereby developing an intuition for how the formula "works"

Show ▾

Arithmetic

Practice basic arithmetic operations

Show ▾

Additions up to 10
Tooth Analysis
Simple Arithmetic

Chart

Students can fill in numerical data into a table defined by the teacher, and a stacked bar chart will automatically update accordingly.

Show ▾

Spreadsheet

As an author, you insert a spreadsheet with data and formula's. Some cells can be marked as 'editable', so students can put in their own numbers and see how that affects the computed cells.

Vrsta orodja

Niselni vzorec

Kaj je miselni zemljevid?

Miselni zemljevid je vizualno orodje za strukturiranje misli. Je hierarhični diagram vsega, o čemer se je razpravljalo. Ključne ideje/besedilo/simboli/barve pomagajo sprožiti pretok misli in podrobnejšo razlago predavatelju.

Za kaj je dober?

Kot učni pripomoček - vizualni element je odličen za sprožanje spominov.

Raziskovanje novih izdelkov in razvijanje novih zamisli - med razpravo o temah se te zabeležijo, kar omogoča lažje spremljanje razvoja zamisli in vizualizacijo za več ljudi.

Kot orodje za reševanje problemov - koristno pri »brainstormingu« problemov in nadgrajevanju idej za določanje rešitev.

Kot predstavitvena metoda - mogoče je prikazati, kako je bil proces razvit, vizualizirati alternativne možnosti in obravnavane teme.

1. Začnite z osredotočenostjo - ta ideja ali misel mora biti v središču vašega miselnega zemljevida.
2. Začrtajte podskupine - Na podlagi glavne ideje določite ključna področja, ki so podskupine vašega fokusa.
3. Nadaljujte z razvojem - Vsaka od vaših podskupin bo verjetno imela svoj sklop podskupin (uporaba ene ključne besede).
4. Razširite - dodajte dodatna dejstva, slike, simbole itd.
5. Dodajte povezave med (pod)skupinami, da predstavite medsebojne odnose.

Primer

vir: <https://www.biggerplate.com/mindmaps/KqfPO5IW/covid-19>

Ali ste vedeli?

1970 - britanski psiholog Tony Buzan je populariziral izraz miselni zemljevid.

Kviz, test, glasovanje

Kviz, test, glasovanje

Spletne teste in kvize je mogoče ponovno uporabiti in deliti - če jih želite uporabiti za vadbo, ni težav.

Običajno lahko izbirate med številnimi vrstami vprašanj, ocenjevanje pa je veliko lažje kot pri običajnih testih.

Nekatera od spodnjih orodij lahko uporabite tudi za zbiranje hitrih povratnih informacij v določenem trenutku, tudi anonimno, tako da lahko učitelj vedno dobi predstavo o tem, kako dobro so učenci razumeli snov.

Oblikovanje cen

Brezplačni preizkus

Jezik vmesnika

Angleščina

Ali ima vgrajen repozitorij, v katerem lahko pregledujemo vsebine, ki so jih ustvarili drugi učitelji?

ne

Ali brezplačna različica podpira spletno sodelovanje?

ne

Težavnostna stopnja

Za strokovnjake
